

Premier 16A

Non-settling, self-supporting mastic

Composition

Premier 16A is a firm mastic based on polybutene, fatty acids, mineral fillers, organic fibres, and water displacing materials.

Uses

Premier 16A is used for sealing cable ducts, conduits and service entry pipes or sleeves, particularly below ground level, to prevent ingress of gas and water. It may also be used for profiling mechanical joints on pipes to allow the application of tapes.

Service Temperature: -15°C to +100°C

Characteristics

Premier 16A:

- can be applied to wet surfaces, and
- complies with British Telecom Specification M212C.

Application

See *Instructions for Use* for additional detail.

Can be used on wet or dry surfaces:

- iron,
- steel,
- glazed earthenware,
- lead,
- brass,
- polythene, and pvc.

Application Temperature: 0°C to +35°C

Availability

Premier 16A is available in 8 x 1 kg blocks per carton (330 mm x 40 mm x 40 mm).

Storage Conditions

Store in a cool and dry place in original packaging.

Waste Material

Please apply the waste hierarchy to minimise or avoid waste wherever possible. Please do not discard waste material, including packaging, in the surrounding environment. Follow all relevant legislation for disposal.

Typical properties

Colour	Pale yellow
Specific gravity	1.43 - 1.73
Specific volume	578 cm ³ / kg
